

# IT POLICY INTRODUCTION

# | First Day Jitters? Reset It!

## **Immediate Fresh Start:**

Your temporary password is set to expire right upon your initial login. It's a quick, one-time passcode!

## **Your Personal Stamp:**

You must change the password right after that first initial login. Think of it as claiming your personal key to the castle.

# | Forgotten Passwords

## Brain Freezes Happen

Forgot your secret combination? Don't worry! It happens to the absolute best of us. Rather than guessing ten times, let's solve it securely.

## The Lifeline

Simply submit a secure password assistance request via our helpful **IT ServiceDesk**. We will verify your identity and get you up and running!

# | Happy Password Birthday!

## An Annual Tradition

Just like your birthday, this event comes once a year! Passwords must be changed **annually** to ensure top-notch security defense. It keeps our defense system highly proactive and leaves zero room for sneaky cyber-party-crashers.

# | Locked Out? Keep Calm!

## **Safety Freeze:**

The system will automatically suspend users after several consecutive unsuccessful access attempts to protect your identity.

## **Quick Re-activation:**

Verify your identity by using the Company SSO Portal at **Gmail** or contact our helpful IT ServiceDesk.

# | Use It or Lose It!

30

Days of Silence

## The Activity Clock

Accounts that go completely quiet and are not used for **30 days** will be temporarily suspended to prevent idle access risks.

**Warning:** If an account remains completely inactive for **90 days**, it will be fully offboarded from our systems. A simple log-in keeps your digital home cozy and active!

# | Your Secret Key Alone

## Sharing is Prohibited

Sharing your account password is **strictly prohibited** for any reason whatsoever. Think of it like a toothbrush—never share it! As the authorized user, you are fully responsible for any and all consequences occurring under your username.

## Digital Security: Access & Passwords

Keeping our company data locked down tighter than a movie spoiler. We all play a part in protecting our digital house, so here is the lowdown on how to keep our data safe.

### Least-Know Basis Only

Like an exclusive VIP lounge. Just because you work here doesn't mean you get a key to every room.

Get access to the systems, files, and tools you absolutely need to do your specific job.

Organized, protects sensitive data, and ensures nobody accidentally deletes a database while looking for the lunch menu.

### Goal: Building an Absolute Fortress

Leaving your front door unlocked with a welcome mat that says "Come on in!" Let's build a brick wall instead.

For your password, it **must** meet these superpowers:

At least **8 characters** minimum. (But honestly, longer is always stronger!)

Your password needs to be a chaotic soup of:

**UPPERCASE** letter

**lowercase** letter

**number**

**special character** (like !, @, #, \$, %)

# The Golden Rules of Gear Use

## Business Purposes Only

The Company provides all Computer Resources to employees for legitimate business purposes. Keep your tools focused on keeping the business moving forward!

## Exercise Sound Judgment

We expect you to bring maximum professionalism and solid decision-making to the table. Treat Ninja Van's gear with the respect and responsibility it deserves.

# With Great Power Comes Responsibility

-  **Total Ownership:** Employees are fully responsible for all activity that occurs on their assigned Computer Resources.
-  **Always Ninja Property:** All assigned devices, hardware, and networks remain the sole and absolute property of Ninja Van.
-  **Data Control:** Proprietary Information stored on company resources belongs strictly to Ninja Van, regardless of ownership status.

# Lost or Compromised Gear?

## Prompt Disclosure is Key!

Whether your laptop is stolen, misplaced, or you suspect unauthorized access to our company data, **your very first step is to report it immediately.**

We work at Ninja speed! Promptly reporting issues minimizes potential leaks, secures customer data, and gets you back online safely.

# Safe Access & System Auditing

## Authorized Access

Access, use, or share company proprietary information only to the level that is authorized and strictly necessary to fulfil your assigned job duties.

## Compliance Audits

Ninja Van reserves the right to periodically monitor and audit all computer resources to guarantee maximum safety and alignment with this policy.

# Love Your Laptop

## Exercise Proper Care!

We work hard to provide you with great tools! It's your friendly duty to safeguard your assigned Company IT equipment.

Please note: employees who neglect this duty may be held accountable for any resulting loss or damage.

# The Assessment Process

## Collaborative Review

If something unfortunate happens, Group IT will work together with your group division to thoroughly assess the situation fairly.

Our priority is always to determine if there was genuine user fault or just bad luck.

## Asset Cost Recovery

If negligence is clearly established, the company reserves the right to recover associated repair or replacement costs.

This recovery applies to lost, stolen, or severely damaged assets that were in your custody.

# Water + Tech = Negligence!

## Liquid Spills are No Joke

Please exercise absolute caution when working with drinks.

**ALL physical and water damages** will be deemed as user negligence.

Keep a safe distance between your morning coffee and your keyboard to avoid a costly situation!

# See Something? Say Something!

## Cyber Security

Report any suspected cybersecurity incidents or malicious activity on Company IT Equipment to IT ServiceDesk.

## Phishing / Spam

Spotted a suspicious email? Don't interact! Send it directly to Information Security by reporting it as spam.

## Equipment Faults

Experiencing hardware failures, screen bugs, or failures? Drop a message to the IT ServiceDesk immediately.

# IT Equipment Failures?

**100%**  
SUPPORT COVERAGE

## No Sweat! We've Got You.

Equipment breakdown is annoying, but it shouldn't stop you! If your company hardware suffers a hardware fault or internal component failure, we have you fully covered.

Simply report any system glitch or complete failure to the **IT ServiceDesk** and we will organize a prompt fix or replacement.

# Lost Device? Step-By-Step

# Incident Reporting Matrix

| Scenario                   | Whom to Contact         | Required Action                                   |
|----------------------------|-------------------------|---------------------------------------------------|
| Cyber Security Incident    | IT ServiceDesk          | Report suspicious, malicious activities instantly |
| Phishing / Suspicious Mail | Information Security    | Report the email as spam in your client           |
| Hardware Fault or Failure  | IT ServiceDesk          | Open a standard fault ticket for help             |
| Laptop or Mobile Loss      | IT ServiceDesk + Police | Report to IT (12 hrs) & Police (48 hrs)           |

THANK YOU &  
WELCOME TO NINJAVAN!
